

# Profile.me update instructions from v1.7 – v1.8

**Step 1:** Backup! You must backup your all files & database before update.

**Step 2:** Download the latest profile.me\_1.8 script file and extract it on your pc. Open **updates > update\_v1.7\_v1.8 > uploads** folder you will see **three files** in there and you need to upload this files in your project please follow the directions below.

1. **application.zip** > upload path: Goto your **project root folder > application** upload this zip file and extract it.
2. **assets.zip** > upload path: Goto your **project root folder > assets** upload this zip file and extract it.
3. **config.zip** > upload path: Goto your **project root folder > application > config** upload this zip file in this folder and extract it.

**Step 3:** Upload “updates” folder in your project root folder

**Step 4:** Open a browser and write url like this: [www.yourdomain.com/updates/update\\_v1.7\\_v1.8](http://www.yourdomain.com/updates/update_v1.7_v1.8) You will see a page like below here enter your item purchase code for update this script.

The screenshot shows the 'Profile.me' logo and 'Welcome to the Update Installer' text. A progress bar at the top has two steps: 'Start' (active, highlighted in blue) and 'Database'. Below the progress bar, there is a 'Purchase Code' section with a text input field labeled 'Enter Purchase Code'. A red arrow points to this field. To the right of the input field is a blue button labeled 'Get License', with another red arrow pointing to it. Below this, there is a small text note: 'If you don't know how to get item purchase code on envato please click the below button'. Below the note is a blue button labeled 'Find my Code'.

**Step 4:** Here provide your current database credentials and wait few seconds for update your scripts.

The screenshot shows the 'Profile.me' logo and 'Welcome to the Installer' text. A progress bar at the top has two steps: 'Start' and 'Database' (active, highlighted in blue). Below the progress bar, there is a 'Database' section with several input fields: 'Host' (pre-filled with 'localhost'), 'Database Name', 'Username', and 'Password'. At the bottom of the form are two blue buttons: 'Prev' and 'Finish'.
